Project funded by the
EUROPEAN UNION

Brains' Mobility between Europe & Mediterranean Countries: Benefits & Issues.

Strategy to Academic Brains' Mobility at the Euro-Med Level

Increase Collaborative Projects

Shared Campuses/ Off-shore Learning Centers/ Uni. Branches

Longstanding institutional cooperation agreements

Focus on Joint Academic Programs

Collaborative, Shared or Joint R&D centers

Apply Virtual Mobility

Develop many flexible Mobility Funding Programs between Euro-Med Countries (bilateral mobility)

Develop an institutional Committee at the Euro-Med Level to review periodically the Higher education learning programs

Push to develop brains in non-traditional sectors

Develop a portal for Euro-Med Universities collaborative projects and researches

Project
funded by the
EUROPEAN UNION

Brains' Mobility between Europe & Mediterranean Countries: Benefits & Issues.

Strategy to Professional Brains' Mobility at the Euro-Med Level

Increase the collaboration between Chambers at all levels (Local, Regional, Euro-med) and raise funds for economic projects

Create Multinational/ Joint Venture/ partnership companies from Euro and Med Countries to recruit professional brains (Chambers to launch B2B meetings & Workshops)

Develop Offshore companies that provide virtual or remote services

Develop Funding programs by the developed countries to create projects in the developing countries

Raise Investments in non-traditional sectors

Develop Tech Parks and attract Foreign companies

Develop a Euro-Med portal (maintained by the chambers) linking the SMEs and professionals to the Industries' firms

Brains' Mobility between Europe & Mediterranean Countries: Benefits & Issues.

Academic – Professional Employment Strategy at the Euro-Med Level

Industries' Projects to be executed totally or partially by Academic institutions (Euro-Med Level)

Universities' Research Projects to be executed within Industry firms (Euro-Med Level)

Employment of Researches' results in economic projects

Develop a Euro-Med Portal (maintained by the chambers) linking Universities' graduates to Industries' vacancies (Euro-Med Level)

Internship programs between Academic institutions and Industries' firms (Euro-Med Level)

Establish Centers of Excellence for Professional & Vocational Trainings in the Med Countries that will provide the academic and non academic junior staff the right skills to be ready for feeding not only the Local but also the Euro market where needed with the skilled workers (Major role of the Euro Institutions)

Project
funded by the
EUROPEAN UNION
