The Centre de Découverte du Monde Marin

At the beginning of 1991, after numerous dives throughout the summer of 1990, and fascinated by the beauty and the rich biodiversity of the seabed, a group of divers decided to create the « *Centre de Découverte du Monde Marin* » to facilitate and develop teaching, study and research of, and approach to, the marine world, both in and on the water and along the coast. This was entirely new. For the first time, an association was created to study the entire habitat of the underwater world. "Discover, understand, love and protect" was to be the motto of CDMM.

An essential vocation of CDMM (which was to become one of its core projects) was: the education of young people, the objectives are the discovery and acquisition of scientific knowledge for the preservation of the marine environment and sustainable development. It is necessary to make to make the individual aware of the direct and indirect links, integration and involvement in the natural environment. It is important to make him a privileged participant in the marine world through knowledge.

One of the unique objectives of the Centre is the discovery of the environment through sporting activities such as sailing, sea kayak, snorkelling and scuba diving. This is how the flora and fauna become accessible to all who wish to discover the secrets of the sea and the coastal areas in light sailing crafts, etc.

CDMM also has a strong team of volunteers who are involved in activities to preserve the marine environment by offering field trips, walks, tours of ships and laboratories, and monthly conferences on all major topics involving the sea. The association has a permanent staff, currently consisting of 10 employees. They frequently organise events such as environmental awareness days and various exhibitions.

CDMM's educational objectives:

According to its statutes, the association has the following objectives which constitute its educational project:

- To facilitate and develop the teaching, study, research and approach to the marine world :
- To enable the discovery of all activities linked to the marine world;
- To raise awareness of the general public of the major problems of the Sea;
- The initiation, the formation and the practice of physical and sports activities related to the sea and the littoral coast.

Action of CDMM:

Since 1999, a team of employees who come from different additional qualifications, develops the 6 poles of the structure:

- Education of young to the environment and to sustainable development : in schools (from primary school to secondary schools), in hospital setting, inside its leisure centre or in others centres;
- Public raising awareness: campaigns, manifestations, outings, conferences, round tables;
- Professional trainings as initial or continue trainings: workshops, thematic lectures, BP APT;
- Providing advice, expertise, environmental management (decision support, prospective global, observation, territory environmental diagnosis, Agenda 21, charters, centre Ecohérent);
- Coordination and animation of the Euro-Mediterranean Network : annual meetings, knowledge pooling, field actions of the SD education actors in Mediterranean;
- Conception and implementation of information devices and pedagogic tools : kits, booklets, methodological guides, CD-ROM, exhibitions...;

Each year, numerous educative projects are deployed for everyone (large public, disadvantaged, in difficulties, needed people, infirm), everywhere (in schools, nautical base, hospital setting, retirement houses, natural environment), at all stage of life (nursery to senior activities), all the time (from scholar time to professional environment and to the leisures), from local to Eu-mediterranean (from Nice harbour to Mediterranean region).

One of the specificities of the association is to use sport as a medium for exploring the environment and, in particular, nautical activities (sailing, sea kayaking, snorkeling, scuba diving). This is the specific choice of the association to enable young people to

discover the sea in different ways.

This discovery awakes the curiosity of young people and allows them, bit by bit, to achieve an understanding of their environment. With each sporting activity, young people emerge with improved techniques, a sense of teamwork with their peers and a new universe in which they will recognize their new experiences.

Membership network:

- International Union for Conservation of Nature (IUCN)
- Réseau mer
- Réseau Culture Science
- Union Française des Océanographes
- Réseau Santé Environnement PACA

Lecture and Prizes:

- The label «Merci dit la planète» of the Ministry of environment obtained in 2001 for summer activities;
- «1000 Défis pour ma planète» regularly the CDMM obtained the price : «1000 défis pour ma planète» awarded by the DIREN, with a lot of other prices for this activities for the youth;
- The label «BIO +» (Obtained in 2001) This table certifies that the Centre de Découverte du Monde Marin develop real naturalistic approach, in terms of awareness, beginner or advanced;
- The trophy «Plan Climat-Energie 06» in the «Sustainable planning» category.

Approvals:

The association is approved:

- Protection of the environment in the Alpes-Maritimes;
- Additional activities for Public Education;
- Youth and Education Popular.

The CDMM is declared «Accueil collectif de mineurs» by Departmental direction of social Cohesion.

To meet its objectives, the Association's activities are structured in the following divisions:

- "Members": outings, monthly conferences and site visits;
- "Animation": activities and entertainments during school period or after school, during holidays or on Wednesdays for young people (7-16 years). In this division, pedagogic tools are created;
- "Euro-Mediterranean Network" in its role as the steering committee of network operations -with the Annual Meeting of the Young and Mediterranean Meetings environmental actions of the association;
- "Training" for specialized or novice adult public. These trainings offer short or long courses mainly oriented towards the discovery of the marine environment and the creation of environmental educational projects. CDMM is accredited as a training organisation by the Departmental Directorate of Labour and participates in the train of BPJEPS APT with UFCV to prepare tomorrow's sportive trainers. Sessions about SD takes place twice a year under the partnership with PLIE (local plan for integration and employment) for long-term job seekers;
- "Sustainable Development" division offers to support EESD approaches for leisure centres to help them to become an "Ecoherent" centre;
- "Expertise and advice on the environment";
- "General management, and secretariat";
- "Communication". Throughout the year, this division is responsible in disseminating the values of the association and in organising free access conferences for the public.

The Centre for the Discovery of Marine world is a multidisciplinary team, each-one carrying particular and complementary skills.

Young and Mediterranean Meetings

The aim of the annual meetings of the young and Mediterranean is to develop and sustain a Euro-Mediterranean network of environmental education by promoting cooperation between countries through meetings, and the use of new technologies to enable communication throughout the year.

The Euro-Mediterranean offers:

- Preparation of an area of observation, exchange of experiences and best practices around the Mediterranean;
- Network sustainability of actors in environmental education and sustainable development in the Mediterranean;
- Development of physical exchanges and shared projects;
- Development of the Young and Mediterranean Meetings' activities.

Each year to achieve objectives, means are implemented:

- The opening of a broad discussion during workshops, focused on the problems of the Mediterranean countries, on how to communicate and work together better;
- An inventory of the Mediterranean basin as seen and felt by the participating scientific associations;
- A real annual focus on the actions brought about to date;
- The valuation of actions implemented by the various Mediterranean countries in the context of environmental protection;
- The sharing of experiences in the field of environmental management;
- The dialogue between researchers and practitioners engaged in environmental education;
 - The transmission from the numerous exchanges with children, schools and young people in the Alpes-Maritimes, the knowledge of the other, cultural exchange and the possibility of maintaining and strengthening these relationships.

In this context, the workshops and an exhibition of the work undertaken during the year by the schoolchildren and the young people in Mediterranean countries are organised during the Annual Forum. The goal is to develop these relationships and foster exchanges throughout the year.

The mobilisation is to propose actions for a sustainable development in an equitable, fair and re-sponsible world (Planet'ERE).

17h00: Delegations welcoming, distribution of the badges and gift bags

17h30 : CDMM, Euro-Mediterranean Network and conference program presentations for

the new members and round table of the participants

18h30 - 20h00 : Welcoming cocktail

Wednesday 8th November:

9h30: Official opening of the 18th Young and Mediterranean Meetings

10h30 – 12h00: Experts presentations under the Ecotourism in the Mediterranean theme

12h00 - 13h30 : Lunch

13h30 – 17h00: Workshops about micro-plastics of our environment

Free evening

Thursday 9th November:

9h15 – 09h30: Coffee welcoming and presentation of the day

For adults:

- 09h30 - 12h30 : Cultural harbor excursion followed by a panel discussion on the concerns, hazards and solutions for sustainable tourism in Villefranche-sur-Mer

- 12h30 - 13h30 : Lunch

For the youth:

- 09h30 - 11h30 : Playful workshop on the current topic

- 11h30 - 12h00 : Lunch

- 12h15 - 13h30 : Cultural harbour excursion

13h30 - 14h00 : Stands preparation

14h00 - 16h00: Presentation of the past year's paramount delegation activities

16h00 - 16h30 : Break

16h30 - 17h30: Output / evaluation of the Network, the Mediterranean Youth Conference, prospects of 2018, discussions and future projects. Election of candidates for the future deployment of a management board

19h00: Evening festivities on the theme of Montenegro situated under the citadel pavilion in Villefranche-sur-Mer

Press release

The Euro-Mediterranean Network will be holding its 18th annual convention in the citadel of Villefranche-sur-Mer on November 7th to 9th 2017. This convention is imperative to assure the protection of our beloved Mediterranean Sea. President Richard Chemla, the members of the administration board and the team of le Centre de Découverte du Monde Marin are happy to, under the honorary presidency of the Euromed City Network, welcome you to this event in the Villefranche-sur-Mer citadel. The country of honor of this year's convent is Montenegro.

During three days of debate and consideration, individuals and parties indispensable to the protection and awareness of the Mediterranean marine and coastal environments will get together and examine one of the topics declared by UN this year, namely sustainable tourism. Operations that are proven effective will be presented to all parties in order to find universal, concrete and sustainable solutions to this issue. This exchange of best practices will allow the delegates to envision solutions to issues in their respective intervention areas.

The Centre de Découverte du Monde Marin is a non-profit organisation of environmental and sustainable development education. The organization is holder and moderator of the Euro-Mediterranean Network. The event's highlights are found in the youth's propositions regarding the topic discussed, in expert seminars, in a showcase exhibition as well as in presentational stands and round table discussions.

Every year, the Mediterranean Youth Conference unites representatives from 21 different countries around the Mediterranean Sea in order to develop and sustain the REM, which is a network of active field operators sharing a common goal; to share and exchange methods and practices, create tools, and realize awareness campaigns all around

the Mediterranean Sea

Guests and speakers of the 18th Meetings

Participants and speakers invited to the 18th conference:

- Mrs. Agnès RAMPAL, delegate of the Euro-Mediterranean, of CUM de Nice and of les Rapatriés, Vice Mayor of Nice, President of the Euro-Mediterranean Commission in the PACA region, Vice President of the Euromed Cities Network. Mrs. Rampal is also present as representative of Mr. Renaud MUSELIER, President of the Regional Council of Provence-Côte d'azur, as well as for Mr. Christian ESTROSI, Mayor of Nice.
- Mrs. Laurence IMBERT, from the Directorate of Environmental Water and Air Quality and la Maison de l'Environnement in Nice. Mrs. Imbert is also present as representative of Mr. Arnaud BONNIN from la ville de Nice and la métropole Nice Côte d'Azur.
- Mr. Xavier BECK, Mayor of Cap d'Ail and he is also present as representative of Mr. Charles-Anges GINESY, President of le Département des Alpes-Maritimes.
- Mr. Jean-François DIETERICH, Mayor of Saint-Jean-Cap-Ferrat.
- Mr. **Yvon MILON**, Vice Mayor of Saint-Jean-Cap-Ferrat.
- Mr. André BEZZINA, Vice Mayor of Villefranche-sur-Me and he is also present as representative of Mr. Christophe TROJANI.
- Mr. Olivier JACQZ, Head of Missions at the Euromed Cities Network.
- Mr. Jean-Pierre FOUCHY, Head of Communications at la Banque Populaire Méditerranée.
- Mr. **Alain GIRAUD**, Director of la Base de l'Aigle Nautique in Nice.
- Mr. Karmenu VELLA at the Direcorate-General for Maritime Affairs and Fisheries at the European Commission has, through a video message, declared his support for activities such as our Convention in order to engage our children and young adults.

Several experts have been given the opportunity to present their work, projects and measures that are in line with this year's theme:

- Mrs. Raffaela CATTANEO, in charge of le service Environnement, and Mrs. Sandra OTTAVIANI at la direction du Tourisme of Villefranche-sur-Mer gave a presentation on the environmental and tourism aspects of Villefranche-sur-Mer bay area
- Mrs. Camille MONTIGLIO, public relations officer at ACCOBAMS, presented the Pelagos Sanctuary and the species residing there as well as voluntary best practices for professionals of whale- and dolphin watching in the Mediterranean Sea
- Mr. Pierre-Charles MARIA, President of the non-profit organization AIR PACA, presented the evolution of maritime passenger transport, specifically regarding increased emissions of air pollutants. He used the example of Marseille harbor to illustrate their air pollution measurements as well as the use of air quality surveillance in order to combat said pollution
- Mr. Yoann BILLON from le service Prévention des déchets at la Métropole Nice Côte d'Azur presented the Urban Waste project that, through interaction and exchange between 11 pilot urban areas, aims to put together management strategies for increased and developed recycling, and decreased waste production.

Evolution of the meetings

15 years already!

For 15 years, the *Centre de Découverte du Monde Marin* organizes the « Assises Jeunes et Méditerranée » (AJM). Every year, many young participate to these meeting and exchange days upon a federative theme with many delegations of the Mediterranean region.

1st, 2nd and 3rd edition - from 2000 to 2002 Initiation of the contacts

These three first Meetings permitted to initialize contacts between the foreign delegations of the Mediterranean region and their counterparts from Nice. This was the occasion to have real exchanges upon the notions of environment education developed in each of the present Mediterranean countries.

4th edition – 2003 Enlargement of the contacts

The fourth Meeting took an other dimension with the organisation of a science seminar on the theme of the year: « Human activities on the sea, fishing ». A year above all marked by the participation of the Nicolas Hulot Fundation for the Nature and the Human with the presence of its ambassadorial sailing ship the « Fleur de Lampaul » and the collaboration always more active from our institutional partners.

5th edition - 2004

Birth of the Euro-Mediterranean Network

This Meeting was organized on the theme « The sea and the men, unity within diversity of the Mediterranean cultures ». During this meeting, the exchanges were stronger and more sustained. The beginning of the Euro-Mediterranean Network starts seriously to take shape. It will officially be activated in 2005, even if it already runs with the delegations of the member countries since the first Meeting.

6th edition - 2005

Turned toward common actions of awareness on water quality, on the theme « Mediterranean sea, mother sea », this Meeting was the occasion to study the potentials to develop projects and exchanges within the Network through European programs. A great will to lead common actions of awareness upon water quality of our coasts emerged of that Meeting.

7th edition - 2006 Signing of the charter

This edition reunited structures more involved than ever in the establishment of a real network of exchanges of skills and experiences. These meetings were realized by the signing of the Convention of Young and Mediterranean Meetings. During this Meeting, every delegation elaborated actions of awareness of big size for the Ocean World Day, great international feast celebrated upon the five continents every year around the 8th of June.

8th edition - 2007

Creation of a coordination Committee

This Meeting gave to the network the occasion to structure itself with the establishment of a coordination committee composed of the representatives from the south and from the north of the Mediterranean sea: Algeria, Italy, Spain, Greece and France. This committee will have in charge to discuss about the future directions of the actions of the network. During this Meeting 2007, every member of that committee presented its actions for the Mediterranean sea. These actions have been realized for the Ocean World Day 2007.

9th edition – 2008

2008 was marked by the start of the Euro-Mediterranean Network and the tight cooperation with Italy. Many workshops of reflection with Mediterranean delegations were organized. The purpose of this 9th meeting was to establish common educational actions for environment, especially for the Ocean World Day (every year in June), to create a common board game (already initiated by Italy), and to create a sideshow/DVD to give value to the actions of every structure.

Evolution of the meetings

10th edition – 2009

A prestigious edition, with all the countries of the Mediterranean region, about environment, culture and peace in Mediterranean. The work of the Greek delegation, honoured for the 10th birthday of the network, shows to everyone the culture and the problems met in that country. The importance of the involvement of the young in the network has been highlighted by the presence of a school class from Greece thanks to the support of a European program. During this meeting, the problematic of the integrated management of the coastal zone was highlighted especially during a workshop proposed by Algeria, and naturally impose itself as the theme of the next meeting. The game of the Mediterranean sea as a common tool of awareness for all the delegations follows its path.

11th edition - 2010

This edition was marked by the participation of many new countries as Palestine, Jordan, Israel, Albania and Lebanon. Novelty of the 2010 edition: the presentation of the actions of the countries from the Mediterranean region done during the International Mediterranean Day. The Meeting welcomed experts of the sustainable development who animated the debates: Pr. Raoul Caruba and Isabelle Poitou.

12th edition - 2011

On the theme « the management of the pollutions in Mediterranean sea », this meeting permitted to develop a common protocol concerning the surveillance of the macro-wastes thanks to the expertise of « MerTerre France » which become sprincipal delegate of the Commission « wastes » of the Euro-Mediterranean Network. Welcome too to the association « MerTerre Liban » developed during the 2010 meeting.

13th edition - 2012

This edition put in light the theme « Ecotourism, sustainable tourism : Issues for the Mediterranean littoral for tomorrow » with as the honoured country : Lebanon. This event permitted the members of the Euro-Mediterranean Network to discuss of the issues of the region, to exchange upon their practices and their operations. In conclusion of that 13th edition, the members decided to increase their efforts concerning European funding, to make the Euro-Mediterranean Network website evolve to a tank of Mediterranean projects, in order to identify every members wishing to collaborate on this or that thematic. This document will permit to know the specifications of each delegation, and to know the priority problematic for each country.

14th edition - 2013

While the Mediterranean region crosses a difficult period economically, politically and socially talking, the members of the Network still met to work on the theme of climate change. This edition was marked by a new type of presentation for the projects. The members could have exchanged more and more, share, make emerge new projects and talk about new thematics as the impact of our everyday lives on the environment

In 2014, 2015 et 2016, the honorary countries of the Convention were Croatia, Morocco and Slovenia, respectively. Several commissions, such as for environmental health, waste and projects, have been put in place during these years. Several countries are represented every year, on average 15 from the Mediterranean Sea. Workshops have been added to the program in order to facilitate participant exchange and sharing of knowledge and best practices. Delegate activities on selected projects that correspond to the annual Convention theme are presented during the Mediterranean Games. Other activities are presented at other occasions during the Convention.

L8th Young and Mediterranean Meetings Speech of CDMM President

Ladies and gentlemen,

Youth of the Mediterranean, from the bottom of our Mediterranean hearts, we welcome you all. Thank you for being here and carrying on this rare and astonishing venture that has persisted for 18 years. Thanks to you this event is one of the Mediterranean's oldest. Thank you for doing this journey, that I know hasn't been easy for all of you. Thank you for doing it with passion and above all, with compassion.

During two days, we will be working on the topics of tourism in the Mediterranean Sea and ecotourism, which are fundamental topics for the life and survival of our lands as well as indicators of their state and health. These topics have lately been put aside due to weakened security and stability in the region. Nevertheless, our alliance depends on the transnational development of them. They constitute a major and indispensable piece of the giant puzzle that is the Mediterranean partnerships and their stability. Transnational relations and sharing of knowledge brings about stability and peace through higher living standards.

We have seen how important these days are to learn about the Network and about your organizations, as well as to increase awareness and improve public relations regarding their operations.

These days will be useful for us during the entire year to come. The 19th convention will take place in 2018 and the 20th in 2019. With the presence of all delegations from every Mediterranean country and the realization of major shared events, the 20th convention must be the height of our efforts... We will talk about it during work meetings.

Thank you to the representatives of formal organizations. I invite you to start these days off with the welcome speech of the vice-mayor of Villefranche-sur-Mer, Mr. André Bezzina.

What will the Mediterranean be like in 2025? Will the North-South breaking be bigger, with some internal breaking to countries? We can already see the North not really stable at the moment, particularly in Spain.

- A vast urban growth 20 million inhabitants in the coast for 2015;
- A difficult water access;
- An elongation of peri-urban displacement in the North (increase of carbon monoxide, nitrogen monoxide, greenhouse gases 7% in 2000, 9% in 2025);
- Tourism development with a supplement of 273 million tourists over 25 years and 137 million in coastal areas;
- An increase of domestic tourism involving the risk of identity lost, precarious employments, and infrastructures oversized;
- An increase of 150% of maritime traffic including 30% for international traffic and rail-road-air freight;
- An increase of aerial traffic of 90% in 25 years;
- Coast attacked from everywhere;
- An increase of energetic demand, sometimes controlled;
- Development mode unsustainable for a long time.

What should we do? How to do? How can we lead tourism for it begins on of the virtuous motors of our Mediterranean?

Future is never written before, in an irreversible way. We should not underestimate the ability of society to adapt to the new challenge, and to correct or anticipate the issues to serve our interest.

Sincerely,

Richard Chemla REM Initiator.

Delegations presentations and posters

Secondary school of Metkovic - Croatia

Neretva Valley is one of the last wet areas with the best conservation in Europe. Several activities are practiced by the public: kite-surf, marathon, biking or again safari photo into the delta. In order to preserve diverse bird species, ringing and monitoring periods are organised. The ornithological museum of Metkovic allows discovering different species of the area.

This delegation implements several actions with students: recycled materials exhibition, Bluebag facebook page, a cleaning coast operation and other to discover.

Center for Protection and Research of Birds of Montenegro - Montenegro

Skadar Lake, with an area of 40,000 hectares, is one of the boundary areas sheltering 281 bird species including pelicans. Since 1983 it became a national park, but this area remains difficult to protect due to historical conflicts, particularly because of illegal traffics. Thanks to pelicans, this lake has a touristic interest needing a conservation activity, and with the regional efforts, the situation improves. Several projects are ingoing, particularly the implementation of nesting platform and a monitoring with video powered by solar panels.

Lycée privé Saint-Joseph - Turkey

Frenchship is a partnership project between 4 scholar establishments at Istanbul, in Greece, in Egypt and at Lorient. The Objective is to favour scholar meetings on selling ship with French as common language, and to propose to the young sportive activities and territory discovery.

Association Nationale Sciences Jeunes découverte de la Nature - Algeria

This delegation makes aware her public to ecotourism with the objective to share this concept thanks to internet and two tourisms journey examples offer: 1/ a test garden at Alger to preserve natural environment combined with a botanic garden with an important floral diversity and a richness for the zoo fauna in order to conserve an educational dimension of the zoo fauna and the ticket gain to allow to sustain this journey and 2/ the tour of the Cité Ghardaïa in the South of Algeria combined with an educational component retracing the history and the organisation of inhabitants of the city ending by the buying of traditional object and valorisation of guide services to ensure a sustainable employment.

Association de Gestion Intégrée des Ressources - Morocco

This delegation presents the contribution of Osprey friend Club to the improving of the sustainable managing of resources of Marine Protected Area in the National Park of Al-Hoceima. The Osprey friend Club was created bringing together numerous youth with the aim to increase the amount of nester couples of ospreys before 2025. Osprey, become the city symbol and factor of development, is yet victim of threats such as illegal trawling threatening its resources, dynamite fishing, copper sulphate, ned disturbance. Actions to reach this goal and decrease threats are: to create a lobby near to fishing parents, to create a following multiparty comity between competent authorities members, gendarmerie, DPM, Waters and Forests and craft fisherman representatives, the AGIR, Osprey friend Club caretaking presided by Al-Hoceima Governor, to form and to imply craft fishermen, to create incomes generating activity based on ecological tourism (fishing tourism, whale-watching, underwater tourism, rustic bed and breakfasts creation). In 2016, it was observed that the amount of osprey couples doubled (from 8 to 16 couples). In the same time, young deduce the comeback of marine resources with a 30%-increase of the fishing capture number leading to a net improvement of the fishermen living quality.

Réseau Euro-Méditerranéen

Delegations presentations and posters

Département de l'Education pour l'Environnement de Badalones - Spain

Barcelona urban agglomeration has 47 parks. The city started management project for its parks under an eco-tourism angle. Different activities are proposed to public: family, school to sensitise to nature values in a sustainable way, energetic saves and be able to integrate nature in the Heart of the city. During the economic crisis in 2008, many families were blocked into the city because they did not have the economical budget to go, and they turned to activities offered by parks. This period has contributed to the success of this action. The Can Soleil i de Can l'Amus park proposes activities to discover: insect hotel, a game space for the little ones in relation to nature, activities with birds (ringing), nocturnal activities, (butterfly observation during the night), photographic testing (image screening of tall the species available at this moment in the park), activities in relation to the history of the city, a scientific garden (cereal crop in the Roman way). For school and high school, biodiversity is emphasised particularly on the butterfly garden, scientific garden (medical and culinary plants as well as the ones used for the fabric and dye) and thanks to a meteorological and a climate change workshop. These activities are proposed one or twice a year. They meet a huge success now needing to develop another strategy to be able to answer public demand.

Aire Marine Protégée de Punta Campanella - Italy

As part of the MARE project, this structure work on an intercultural exchange in the South of Naples in a park open since about twenty years representing 40km of linear coast. Voluntary people are integrated thanks to environmental discovery outing such as pedestrian walk, snorkelling and others sports. They are also initiated to marine biology by the microscopic observation of some organisms. Learning Italian language is proposed through the Erasmus + program as well as gastronomic culture (pasta and pizza tasting). Public activities proposed by this park are really large: kayak, remarkable site visits (caves), boat outgoing, fisherman meeting and explanations about fishing. Another part is devoted to park monitoring and boater staff awareness about mooring areas proposed and posidonia respect. Park works for the sea turtles preservation welcoming the injured ones to treat and relax them into their habitats. 8 volunteers work for 9 months into the park. MARE project is at its 5th year (since 2013) with 31 volunteers participating.

Development Organisation to Support Women and Youth - Libya

This delegation remember us the importance to sensitive public on maintaining clean beaches and particularly at the safety for all. Despite of the difficult climate in Libya, young students from 8 to 14 years are framed from Marsh to the beginning of summer by organisms such as scouts and environmental guide, Red Cross and local structures.

Cap Bizerte - Tunisia

This delegation presented a project about green jobs serving eco-tourism at the destination of younth joblessness from disadvantaged background from Bizerte coast (Ghar Melh, Rafrat, Sidi, Mechreg). The aims of this project are to train to different jobs: fishing guide, archaeologist scuba diver with ecological component and fish farming scuba diver. Partners are associated to the different training programs: the Fédération tunisienne des pêches sportives, the National Institute of Heritage and the Centre Technical Fish farming. This project takes into account the opportunity which represents sustainable tourism, concept yet virgin in Tunisia in association with a diversification of activities proposed to tourists. Profits tackling by this project are to fight against unemployment and poverty, while including environmental preservation and sustainable development in these areas by generating revenues.

Association Marocaine des Petits Débrouillards - Morocco

Purposes of this association are to initiate to the scientific, technologic and environmental culture in the youth, with scholar public, general public, recreation centre, etc. Volunteers intervene to maintain clean beaches, which represents 3500 km on the Mediterranean coast and well more for the Atlantic one, favour the discovery of biodiversity thanks to an exposition "Good knowledge of our coastline". Since 2016, a law has been applied in Morocco about the coastline protection particularly to act against stolen sand, robbed for construction. Like in France, urbanism is controlled with an interdiction to build along the coastline. This law asks again some improvements in term of application because it

Delegations presentations and posters

is not often respected. The association participated to the COP 22, where it animated workshops, lecture and participated to debate. A project is in place to organise a trip by caravan through Morocco in order to meet refugees and learn how to live together

Citoyennetés méditerranéennes - Morocco/Spain

This new association is based in France. It works with Maghreb countries on thematic of population migration, often based on ecological consequences of climate change. This association was present at the COP 21.

Association Maat for Peace, Development and Human Rights - Egypt

CThis association joined the Euro Mediterranean Network this year. Rem is pleased to welcome this new member. As part of a project founded by Europe this delegation implements volunteer activities to promote the Human Rights in public areas and schools. Communicative tools has been created such as poster in Arabic and translated in English, others in braille to facilitate the reading for blinded people. It also goes in medical environment to the application of good working condition and the respect of patients. It works with others ONG for technical support and goes to European Commission to develop these lines of sustainable development at a social level.

_Delegations presentations and posters

Association Morigenos - Slovenian Marine Mammal Society - Slovenia

This delegation has implemented a project for the dolphin protection and particularly a species living in the Trieste Golf, the bottlenose dolphin (Tursiops truncatus). From 2002 to 2017, a campaign of count and sensitisation using pedagogical tools and outgoing in the sea and on land allows to realise a monitoring of dolphins and to identify them. Between 70 and 150 dolphins are present throughout the year in this area. At the occasion of public events, intervention in school, summer camp and conferences, public could learn to recognise sounds from these animals and observe their adopted behaviour during hunting and games. When the id is hard in situ, fin photography will allow completing the monitoring and the improvement of observatory technics. Analyses of the animals finding dead are also carry out to supply the data base.

Association Pinna pour le Développement et la Promotion de l'Ecotourisme (APDPE) - Tunisia

Despite its missing this delegation wants to share with us an interesting project for the implementation of a submarine path. ECOMEL is financed by the UICN as part of the PPI-OSCAN program for the promotion of eco-tourism in North Africa and particularly at Melloula where some posters were created to go with visitor on the first submarine path in Tunisia. 12 persons have been trained to the managing of the path and for its animation. A partnership between Pinna association and touristic local actors was signed for the managing of the submarine path and the development of touristic offers (guest house, scuba diving club, yoga lessons, restauration points, boat journey). In parallel, sensitisation and cleaning campaigns has been organised with young and families.

Association BARIQ 21 - Algeria

éseau Euro-Méditerranéen

This association just joins the Euro Mediterranean Network, and was able to present its protection assignments of Human and nature with a sight of solidarity to transmit to the next generations. This structure develops projects on promotion of renewable energy, sustainable development and sensitisation of public to environment and ecology.

It has as purpose for the period from 2010 to 2020 to realise the number of "111" for 100 campaign of sensitisation, install 10 solar water heaters and to sensitise populations to use solar kits and to lead 1 project with positive energy (solar installation or organic tomatoes without carbon production).

It also mixes sport, culture, sustainable tourism and citizenship to its actions proposing kitchen workshop, tasting (for example a traditional meal with dry organic tomatoes), but also photo exhibition about the different phases of their projects, painting workshops for children and a testing for more than 2000 people of a recipe based on tomatoes, olive and red cheese

_Vote for management Council of the REM

During the Young and Mediterranean Meetings in 2016, members of the Euro Mediterranean Network proposed to create a management consultancy allowing to its members to develop more actions in its name, to help in the next Mediterranean Youth Consultancy programming, to contribute the international promoting etc. Articles governing this consultancy have been redacted.

First article: A management council is created to manage the Euro-Mediterranean Network. Its role is to organize the functionning of the Network, of the meetings, more particularly the Young and Mediterranean Meetings and the common actions engaged by the Network.

2nd article: This Council is composed by 6 members elected for 3 years by the Network members who are present to the meetings. The responsible of the CDMM as the organiser and the permanent head office of the Network and Cap Bizerte as Facebook page administrator are the officio members.

3rd article: The Council has to meet one a year, on a different date than the Young and Mediterranean Meetings. For the meeting location, it will take place in a Network member country. The Council rules on the organization of the Network meetings for the next year and of the different actions.

4th article: It has the possibility to beg and to represent the Network in all official situations and for all the help requests, funds requests and sustaining.

5th article: The elected members must engaged to be present or to be represented in the meetings of this Council. 2 consecutive absences allows to replace.

This consultancy is approved by the whole present members to the 17th Young and Mediterranean Meetings.

A vote was realised by the present members to the last Young and Mediterranean Meetings in 2017 by delivery of a vote paper for each represented structure. Each vote paper contained the name and the structure of represented people and their application to join the managing consultancy.

In order to allow the vote of non-present members applications were sent by email.

To date, results of the vote are still unknown due to the sending delay and the application receipt, they will announced shortly, probably to the next Young and Mediterranean Meetings from the 2nd to the 4th of October 2018.

Workshops

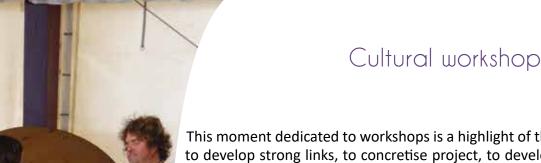

This moment dedicated to workshops is a highlight of the program. It allows to gather, to develop strong links, to concretise project, to develop tools, to discuss about field problematics that the members had to face, etc.

2 workshops were proposed this year about the Health and Environment:

-First one to sensitise to the microbeads presence into cosmetics, which are not retains by the wastewater treatment plant and to learn how to recognise daily product with them.

-Second one to learn to avoid those microbeads during shopping and to choose product without them.

This moment dedicated to workshops is a highlight of the program. It allows to gather, to develop strong links, to concretise project, to develop tools, to discuss about field problematics that the members had to face, etc.

4 cultural tools allowed discovering Villefranche Bay richness, city welcoming the Young and Mediterranean Meetings, and we are really thankful for its help and its support in the organisation of this really important event.

The Tourist Office, represented by Mrs Ottaviani and the environmental service by Mrs Cattaneo presented the Bay history, its geological, geographical, bathymetric characteristics, marine species meets and tourism aspect. The purpose was to fly over the tourism offer proposed to tourists (cruises, buses, hotels, catering...) to understand issues for a sustainable tourism despite of the massive tourism flow and to limit some pollution types (noise, atmospheric, visual, waste rejection). For example to limit abandon of cruise tickets outside of bins, "expressive panels" are implement to allow to tourists to stick the ticket favouring the ornament of the city.

A trip aboard the Santo Sospir boat allowed completing this presentation of the Bay with a sea observation to tackle the point mentioned above.

Then, an interactive quiz was lead on the ecotourism theme to awake curiosity, to fix mass tourism problematics and to raise debate to implement sustainable tourism. Questions were also about responsible behaviours, label to favour to use cosmetics.

For the youngest, the game "Mediterranean puzzle" where through the goose game with a tray and a wheel, young had to cross the Mediterranean thanks to the good answers. Questions was about Mediterranean culture, mimic on responsible behaviour, geographical, political, money, gastronomical and others questions.

Closing evening

The closing evening took place under the Citadel of Villefranche – Sur – Mer marquee with a warm ambience where everyone could have a great moment. Place under the Montenegro theme, members of the Center for Protection and Research of Birds delegation offered a dinner cocktail to participants with speciality from their country.

This party allowed to participants to exchange, to know each other in another way than the conference cycle and workshops proposed during the day. They were able to meet Young and Mediterranean Meetings partners, without whom this event cannot take place. Numerous of participants created contact with others to establish project together for the Mediterranean protection.

An entertainment was offered by the student in theatre from Nice Conservatory to propose some improvisation duels in team. The aim was to make the jury, composed by the whole participants, guess situations. English translation of some French attitudes enjoyed the English members.

News in the Network horizon 2018

Tracks for 2018:

Pedagogic tools adapted to Mediterranean - "Blue Learning Program"

During the 2015 Young and Mediterranean Meetings, Kliment MINDJOV from Regional Environmental Center (REC) in Hungary could present the Green Pack tool to REM members in the aim to consider creating pedagogic tool adapted to the Mediterranean to approach environment, heritage, job, culture and social thematic. This year, a file was deposed to obtain an Erasmus + funding under the strategical partnership to exchange on good practices in the education field. This project gathers several partners such as Open Education Centre Foundation in Bulgaria, REC as technical partner, CDMM, Lerins Islands CPIE and Venice University which is the project leader. In the case of a positive answer regarding the funding, launching events will be organised and the Network members will be invited to give their opinions.

Young and Mediterranean Meetings 2018:

The next Young and Mediterranean Meetings 2018 will take place at Nice from the 2nd to the 4th of October 2018 under the "Health and Environment in the Mediterranean" theme.

Communication - 2018:

To communicate within the Euro Mediterranean Network, a newsletter is put to the disposition of members to transmit information about the environment in Mediterranean and the actions in its periphery.

A short video demand will get to you. REM would like to create a document, under the shape of several videos where structure represents and their young will send a small plane containing a message with good practices, responsible behaviour or ecological ideal to reach.

Members demands:

Some members look for collaboration to lead their projects:

- 1. Under the Enric CAHNER solicitation from the Département d'Education pour l'Environnement (Badalones), CDMM ask to members who will be interested to work on the public sensitisation in urban area to have feedbacks and to create an available collection.
- 2. Laurent CHAPDELAINE from Lycée Saint-Joseph (Turkey) solicits interested members to lead communal actions, with a message and a communication identic. An action is thinking for the Ocean Day, the 8th of June 2018.
- 3. For projects with children, particularly as part of recreational centre, CDMM would create a link with others structures welcoming children to exchange between animators and directors good practices and consider sharing actions.
- 4. CDMM asked for collaboration with a high school class.

If you wish to publish a partnership looking, to communicate with other members, to have information, you can write to cdmm@resomed.org

Provisional program of 2018 Meetings in Nice

Tuesday 02nd October 2018:

17h00: Welcoming of the delegations;

17h30: Ice breaking - Signature of the charter of the Network for the new members;

18h30 : Welcoming cocktail.

Wednesday 03rd October 2018 : at the Centre Universitaire Méditerranéen of Nice

9h30: Official opening ceremony of the 19th Young and Mediterranean Meetings «Health and Environment in the Mediterranean»;

10h30 : Official pictures;

11h00 - 12h00 : Professor Patrick Fenichel presentation about endocrine distruptor;

13h00: Lunch;

13h30 - 17h00: Workshops on the annual theme;

Free evening.

Thursday 04th October 2018:

9h00: Welcoming of the participants and presentation of the day;

09h15 : Delegations presentations on the thematic;

12h00 : Lunch;

13h30-15h30: Cultural workshop and following of the presentations;

15h30 - 16h30 : Restitution, assessment / Evaluation of the Network and the Young and Mediterranean Meetings by the participants, perspectives 2019;

19h00 : Closing evening, official speeches in the *Centre Universitaire Méditerranéen* of Nice.

Au Maroc, des déchets au musée

ESSOURCES EXPLORE LES FACETTES DU DÉVELOPPEMENT DURABLE

Après Paris, la Cop a eu lieu au Maroc, pays aux multiples défis environnementaux, à l'instar de celui des déchets. L'artiste Ghizlane Sahli y pioche pour créer. PAR SANA SBOUAÌ

12 / Chroniques méditerranéennes

TOUT AUTOUR DE LA MÉDITERRANÉE.

HIZLANE SAHLI, CENESISOOS JES MIXTES SUB PANNEAU

de la partie des poumons où ont lieu les échanges gazeux avec le sang. Ghizlane Sahli, artiste marocaine, est un croisement des deux. Elle confectionne et créé un changement. Ses alvéoles sont faites de fonds de bouteilles en plastique entourés de fil végétal. Un mix inattendu entre ces détritus - « abjet créé par l'homme et avec le pire destin, celui de finir à la poubelle » - et de la soie naturelle d'Aloe vera.

e sont des « alvéoles ». En apiculture,

il s'agit d'une cavité fabriquée par

les abeilles. Dans le corps huma

Pour créer ses œuvres, Ghizlane Sahli travaille avec des femmes artisanes pour la soie, et des cafés de Marrakech, où elle récapère... 1 000 bouteilles par semaine.

« Un mini-système de recyclage a ou le jour », précise celle dont l'art a ainsi changé les comportements et prête à réfléchir.

Questionner la société par l'art, C'est en 2014 que cette architecte de formation, alors à la tête d'une marque de vétements brodés pour enfants, saute le pas de la création artistique, sollicitée par un magazine marocuin. Pour un concours, il lui est demandé de créer une robe à partir de bouteilles usagées. Elle se prend au jeu de la réutilisation de matériaux : « Les déchets regorgent d'énergie, c'est une matière pleine d'histoires antérieures... Ca m'a beaucoup parlé. »

Peu après, avec le collectif Zbel Manifesto (Manifeste des poubelles) dont elle est membre, elle créée l'installation Pimp My Garbage pour la Biennale d'art contemporain de Marrakech. Une œuvre-choc qui reconstitue un appartement à partir de déchets. Le spectateur y passe dans un couloir, rempli de rideaux de bouteilles en plastique. Puis arrive dans une chambre faite de détritus, du sol au plafond : packs de bières, paquets de cigarettes, canettes... L'ambiance y est suffocante. Partout, on reconnaît des produits de consommation. « Pimp My Garbage a touché les gens, de toutes clusses sociales, de tout pays... L'art est là pour ça : questionner », conclut Ghizlane Sahli. •

TROIS QUESTIONS À RICHARD CHEMLA, PRÉSIDENT-FONDATEUR DU NIÇOIS CENTRE DE DÉCOUVERTE DU MONDE

PROPOS RECUEILLIS PAR AURĒLIE SĒLVĪ

MARIN:

R. M. : Après Paris, la Cop22 s'est tenue au Maroc, sans grand retentissement. Quel intérét ? B.C. CHITHE important de créer un lien durable avec les

pays des rivages sud. Parce qu'ils sont demandeurs et car environnement et géopolitique sont liés. Cette Cop répond aussi à une envie de la jeunesse, des techniciens, des ingénieurs, dans un pays qui vient de bâtir deux centrales. solaires inéditos par leur grandeur et leur capacité à stocker l'émergie pour la distribuer le soir.

Pourtant, les pays des rivages nord se posent souvent en pionniers du développement durable...

Oublions ce regard colonialiste. Les enjeux environnementaux, comme l'érosion des plages, sont les mêmes en Méditenanée. L'environnement doit aussi permettre d'évoquer l'humain. Dans cette région tumultueuse, on ne peut pas parter protection des sardines dans certains pays où des gens ont le ventre vide. On ne peut accepter, non plus, que des jeunes. fuyant leur pays, meurent sur nos côtes.

Yous avez crèé les Assises jeunes et Méditerranée, un rendez-vous azuréen annuel. Leur but ?

Quand on plonge, on s'aperçoit que les poissons ne s anétent pas à la frontière italienne pour montrer leurs papiers. Nos problèmes ne se régleront qu'à l'échelle méditerranéenne car on partage des facteurs climatiques, culturals, historiques, Les Assises réunissent la jeunesse du bassin autour de ces enjeux communs, car c'est souvent plus facile de travailles as des jeunes qu'avec des institutions... En 17 ans, on es devenu le 1º réseau méditerranéen en nombre de par (17 en 2006).

Charte du Réseau Euro Méditerranéen

« Nous n'héritons pas de la terre de nos ancêtres, nous l'empruntons à nos enfants » A. de St Exupéry

Article 1 : Les signataires s'engagent à favoriser les actions communes en vue de la communication, de la sensibilisation et de l'éducation à l'environnement marin et littoral tout en tenant compte des différences de chacun.

Article 2 : Il est créé un Comité représentatif qui regroupe au moins un représentant de chaque pays engagé dans cette charte. Ce comité communique au moins une fois par trimestre et se réunit au moins deux fois par an, sur un mode tournant (une ville différente à chaque réunion).

Article 3 : Les membres s'engagent à signaler leur participation à ce réseau le plus souvent possible par tous les moyens en leur possession : presse, communiqués, papiers à entête...et à tenir informé régulièrement le comité consultatif. Ils s'engagent aussi à utiliser dans toutes correspondances ou actions le logo commun.

Article 4 : Créer un outil regroupant l'ensemble des participants avec leurs coordonnées pour favoriser et développer les échanges au sein des membres et des outils communs.

Article 5 : Assurer constamment une volonté d'échanger, de communiquer, de valoriser les démarches et actions communes dans l'intérêt de chacun.

Article 6 : Les membres adhérents assurent le respect des principes de démocratie participative, de diversité, d'indépendance sans aucune prépondérance d'aucun pays quel qu'il soit.

Article 7 : Une fois par an un programme minimum d'actions communes est présenté lors des Assises pour être approuvé et un compte rendu annuel est publié lors des assises suivantes.

Article 8 : La présidence des Assises se fera sur un mode tournant annuel et l'organisation des Assises pourra éventuellement changer de ville ou de pays sur proposition d'un des membres soumise lors des séances plénières.

Réseau Euro-Méditerranéen

Charter of the Euro Mediterranean Network "We do not inherit the earth from our ancestors, we borrow it from our children" A. de St Exupéry

- Article 1: The signatories commit to the promotion of the common goals of communicating awareness and education of the marine environment and the littoral, whilst taking into account the differences of each signatory.
- Article 2: A Representative Committee is created which regroups at least one representative from each country committed to this charter. This Committee will communicate at least once every trimester and will meet at least twice annually on a rotating basis (a different city for each meeting).
- Article 3: The members agree to bring attention to their participation in this network as often as possible by any means available to them: press releases, statements, letter-head paper etc., and to keep the Representative Committee regularly informed. They also commit to using the common logo in all of their correspondence.
- Article 4: Create a database grouping together all of the participants and their co-ordinates, which will promote and develop exchanges within the members and their common tools.
- Article 5: Constantly ensure a willingness to exchange, to communicate and to promote the steps and actions which are in the common interest of each one.
- Article 5: The club members ensure the respect of participative democratic principles and the diversity and independence of each, without predominance of any country whatsoever.
- Article 7: Once a year, a programme of common actions is presented during the General Meeting for approval, and an annual report is published during the following General Meeting.
- Article 8: The presidency of the General Meeting will rotate on an annual basis and the organisation of the General Meeting may change from city to city (country to country) by a proposal submitted by one of the members during the plenary sessions.
