**RSMF – Remote Student Monitoring Framework for Securing Exams**

## Advancing remote exams in Higher Education

24 October 2023, from 11:00am to 1:00pm CEST  
Rome, Italy and online

REGISTER [HERE](#)

**Venue: UNIMED – Mediterranean Universities Union**  
**Corso Vittorio Emanuele II, 244 – 00186 Rome (Italy) and online**

### BACKGROUND

In recent years, and following the outbreak of the COVID-19 pandemic, higher education has witnessed a significant shift towards online learning, and one aspect of this transformation is the increasing prevalence of online exams. In addition to the general difficulties of conducting assessments remotely, universities faced issues related to the lack of preparedness and the need for physical interactions in certain courses such as face-to-face classes and laboratory activities. These challenges called for innovative solutions to ensure the continuity and quality of assessments.

As technology continues to advance and institutions adapt to the changing educational landscape, the **Remote Exams Security and Monitoring Framework (RSMF)** project is working as a timely and comprehensive solution to the challenges of remote assessment.

The RSMF project is funded by the Erasmus+ programme of the European Union and it seeks to develop a robust evaluation system for remote exams in Higher Education Institutions, aligned with the guidelines and regulations of Quality Assurance Agencies in Europe. The project's primary focus is to make remote exams economically feasible and practically viable while ensuring the security and integrity of the assessment process. RSMF is implemented by a consortium composed of 5 partners from 4 EU countries: Politechnika Białostocka (Poland) as coordinator, Neapolis University Pafos (Cyprus), University of Piraeus Research Center (Greece), ENOROS Consulting Limited (Cyprus) and UNIMED - Mediterranean Universities Union (Italy).

Co-funded by  
the European Union

## OBJECTIVES OF THE EVENT

- Present the RSMF monitoring platform, which provides an objective and comprehensive approach to detecting suspicious behaviours during exams;
- Explore ways to minimise cheating among students and possible use of the RSMF monitoring platform in different Higher Education contexts.

## TARGET AUDIENCE

The event will be of interest to Higher Education academic staff, students, and administrative staff, and anyone interested in discussing new approaches to transform remote exams in Higher Education.

## LANGUAGE

The event will be held in English.

## HOW TO ATTEND

The event is free and open to everyone, and it's a hybrid event.

For both onsite and online participation, kindly register [here](#). Registrations will remain open until the day of the event. We recommend you to check your time zone here
